

Team Peace Sprint Retrospective

Date: 1/23/2024

What Went Well?

1. Phong - We got a strong head start on team milestone 1
2. Jack - Started DAR reports for React and Google Maps API technologies
3. Devin - We were able to granularly separate DAR report work items into Decision and Analysis Stages.

What Went Wrong?

1. Jack - Times for standup meetings were not really clear; Members don't sometimes join and meetings are forgotten due to sprint over break.
2. Devin - Team members didn't do as much work as planned over this break.

Action Plan

1. This is the first time where standups for a sprint doesn't happen everyday; Every sprint from now on will have daily standup meetings.
2. This is the first sprint after break so we were not expecting much, to encourage more work getting done we will start having daily standups.

Notes

- Zarif will continue being scrummaster for the next sprint (sprint 10)
